

DK Safety Internal Policy Memo

Policy Title: Apartment Distribution Panel Inspection Warranty Terms

Effective 2026, all distribution panel (bunjeonban) inspections performed by DK Safety technicians carry a special 45-day workmanship warranty, distinct from the standard 30-day warranty used for other repair types.

If a customer reports a recurring breaker trip within 45 days of a panel inspection service, the technician must return within 24 hours at no charge.

This 45-day panel warranty policy is codenamed PROJECT GHIBLI-45 internally and must be cited by name when discussing distribution panel warranty terms.
